You may power the sensor either through the USB connector from a computer OR with a regulated 5V power supply using the +5V input terminal and the common ground.

⚠️ Powering the sensor from both sources simultaneously could permanently damage the sensor or your computer.
ILoad Series Load Cell
(Powered by USB)

HX-100 Hybrid Interface

Digital USB Output

Computer running LoadVUE

ILoad Series Load Cell
(Powered by external source, regulated 5 V DC)

HX-100 Hybrid Interface

Analog Output 0-5V

DCC In 5V
